POWER CLAMP ADVANTAGES

The five most important reasons for HAIMER shrinking technology

1.

For Ø 1/8"–2" (3–50 mm) for solid carbide and HSS tools

- Shrinking range for Power Clamp Mini and Power Clamp Nano 1/8"–2" (3–16 mm)

2.

Shrinking and cooling in record time

- Tool change at the touch of a button
- Water-cooled cooling bodies
- Concentrated cooling efficiency due to contact cooling
- Even cooling: No material deformation

3.

Universal shrinking technology with flexible modular system

- Suitable for all applications
- Also for extremely long tools

4.

Handling adapted to workshop practices

- Optimum protection against burning
- Hot parts need not be taken into the hand
- No heating of the taper
- No heating of the tool
- Easy handling

5.

Minimal heating due to manual operation

- Long life of the chuck
- Short cooling rate
- Low energy consumption due to precisely metered energy supply

See the HAIMER Power Clamp
Shrink Fit System in Action:

COIL TECHNOLOGY

Coil technology

The induction coil is the core of inductive shrink fit technology. HAIMER has been the leading developer of inductive shrink fit technology for tool holders for years. A number of patents, predominantly in the field of induction coils, is the visible proof of our innovation and advancement.

Standard coil

Standard coil

The standard coils have been proven for years with interchangeable stop disks. All shrink fit chucks with a diameter of 1/8" – 1 1/4" (3 to 32 mm) can be heated with a single coil. Just 5 stop disks are enough to adapt the coil to each chuck, from the smallest to the largest.

NG coils (New Generation)

The intelligent NG coils are particularly flexible and comfortable. They are adjustable. With one turn, you can set the coil to the size of the shrink fit chucks, both in length and diameter. Stop disks are no longer necessary. This means the chuck is only heated where it is intended. Even with special sizes.

NG coil

Power electronics

The second component of shrink fit technology is power electronics. It supplies the coil with power. Frequency and current must be exactly coordinated with one another to do this. Heating must take place within seconds, without overheating the chuck. A specially developed procedure for power regulation makes sure this is the case, independent of the main voltage. HAIMER offers shrink fit equipment with an output of 3 to 20 kW.

Operation

Equally decisive for the success of an investment is its acceptance among your employees. A machine, which is used happily and frequently, pays for itself within a short period of time. HAIMER shrink fit equipment can be equipped for any purpose and need. From a simple device with one shrink fit station and no cooling, up to fully equipped machines with rotary table, integrated contact cooling and system cart.

CONTACT COOLING

Contact Cooling

The patented cooling system from HAIMER is the quickest and cleanest method of cooling shrink fit chucks.

There is a suitable cooling body for every chuck.

The cooling body sits with the surface contact on the chuck and removes the heat from it.

A water cycle cools the cooling body in turn.

The cooling procedure takes place completely evenly and gently.

There is no deformation of the chuck. The runout accuracy is preserved.

The chucks do not come into contact with the water.

They remain dry and do not rust.

The work place also remains clean and dry.

Cooling body for rapid cooling

- Cooling in record time: approx. 30 sec.
- Tool holders remain dry
- No build-up of rust
- No time lost through drying process
- Even cooling, runout accuracy is maintained
- Hot points are always covered, no risk of injury
- Hot parts need not be touched
- Gentle handling of chuck, no shocking
- No heating of cooling body, even after lots of shrink fit procedures: heat is removed with contact cooling
- 5 cooling bodies for all standardized chucks
- No messy water = a clean work space

THE POWER CLAMP SYSTEM: BASIC LINE/PROFI LINE/PREMIUM LINE

HAIMER has the right Shrink fit technology for any need.

Take advantage of the largest range of shrink fit equipment and coils in the world.

Basic Line: Concentrating on the basics.

The Basic Line is the economical entrance into inductive shrink fit technology. The power electronics enables problem free shrinking. The mechanical construction of the equipment has, on the other hand, been kept deliberately simple and functional. There are just single chuck solutions.

The Basic Line equipment is exclusively designed for operation with standard coils. It is not possible to upgrade.

The Basic Line is ideal for the price-conscious user, who only wants to shrink a few tools on a daily basis.

For micro machining purposes the special horizontal shrink fit unit Power Clamp Nano is part of the program. It combines perfectly easy tool handling of small diameters and fast tool exchange.

Profi Line: Modular Versatility.

The Profi Line offers the full range of performance and is unbeatable in efficiency. High performance coils, contact cooling and rotary table guarantee simultaneous shrinking and cooling in record time. No wishes remain unfulfilled.

The machines of the Profi Line work with both the standard coils and the intelligent and comfortable NG coils. Of course, the equipment recognizes each coil and chooses the correct shrink fit parameters automatically.

The shrink fit units of the Profi Line form a modular system.

The start-up machine Power Clamp Economic can gradually be upgraded to the high-end unit Power Clamp Comfort NG.

Premium Line: Perfection in detail.

The Premium Line is the series for highest demands.

The shrink fit machines of this line are perfectly suitable for users relying on this clamping technology due to its various advantages and accordingly having many shrink fit jobs a day.

The idea of fixed cooling stations equipped with guided cooling bodies of different diameter simplifies the handling of these high-end machines.

The aspect of service and safety is considered intensively for the Premium Line, too, as the cool-down process is terminated temperature controlled automatically.

The Power Clamp Premium series is a modular system and the machines are to be configured up on request.

AMORTIZATION HAIMER POWER CLAMP

The following diagram shows the amortization of the Power Clamp Comfort NG with Speed Cooler in relation to the number of shrink cycles per day.

Time Savings: 5 min. per cycle

Cost per Employee/Hour: \$ 50.00/h

50 jobs/day

30 jobs/day

20 jobs/day

10 jobs/day

Gripping Torque Data:

Clamping torque, absolute values [ft/lb]

Clamping torque, percentage (HAIMER = 100%)

POWER CLAMP NANO

Simple shrink fit machine for small tools.

- Power: approx. 13 kW
- Mains voltage: 3x400–480V, 16 A
- Tools: solid carbide and HSS from Ø 1/8"–5/8" (3–16 mm)
- Easy tool handling by horizontal shrinking

Stop disc

Chuck support for tool holders with bajonet clamping

Air cooling

Cooling by compressed air, regardless of contour and safest handling for small tool holders

Length presetting

Horizontal length presetting unit
Tolerance 0.05 mm

Calibration adapter for length presetting (optional)
For presetting of the measuring device

Clips for tools (optional)

For safest and precise handling of high quality carbide tools - especially for smaller diameters

Technical details		Order No.
Power Clamp Nano		80.160.01.3
Mains voltage	3x400–480 Volt, 16 Ampere, 13 kW	
Tools	solid carbide and HSS

POWER CLAMP BASIC LINE

POWER CLAMP MINI

- Standard shrink fit device for all tools (solid carbide and HSS).**
- Power: approx. 10kW
 - Mains voltage: 3 x 380–480 V, 16A
 - Tools: solid carbide and HSS from Ø 1/8"–5/8" (3–16 mm)
 - 1 base holder included
 - 1 chuck support included

POWER CLAMP BASIC

- Standard shrink fit device for all tools (solid carbide and HSS).**
- Power: approx. 10kW
 - Mains voltage: 3 x 400–480 V, 16A
 - Tools: solid carbide and HSS from Ø 1/8"–1¼" (3–32mm)
 - 1 base holder included
 - 1 chuck support included

Technical details		Order No.
Power Clamp Mini		80.143.00
Mains voltage	3x380–480 Volt, 16 Ampere, 10 kW	
Tool diameter	Ø 1/8"–5/8" (3–16 mm)

POWER CLAMP PROFI LINE THE MODULAR SYSTEM

The Profi Line from HAIMER is the very latest in shrink fit technology. Even starting with the economical start-up, Power Clamp Economic, the door is open for professional tool clamping.

Step by step more shrink fit technology.

The base unit can be combined with two rear walls and two base plates. The chuck support for the rotary table will be supplied as requested.

Power Clamp		Order No.
Speed Cooler upgrade kit (=Power Clamp Economic Plus) – Expansion Plane 1	Speed Cooler with rear wall incl. 5 cooling bodies	80.115.01
Rotary table upgrade kit (= Power Clamp Comfort) – Expansion Plane 2	Base plate with rotary table for 3 chucks incl. side drawers (For a full Comfort machine, both expansion planes #1 and #2 are required)	80.116.00
Upgrade Kit Preset	Measuring plate, height gage, 2 precision base holder incl. side drawers	80.117.00

POWER CLAMP PROFI LINE PROGRAM

An ideal entry-level shrink machine: Tomorrow's technology.

A start into modern shrink fit technology:
State of the art coil technology at low costs.
The question is not "Should I invest in shrink fit technology" but rather "When will I invest in shrink fit technology". It is now time to invest in the technology of the future.

Our modular system offers the ideal start-up solution.

Power Clamp Economic NG without cooling,
without rotary table, with integrated tool tray

Power Clamp Economic Plus NG with cooling,
without rotary table, incl. 1 base holder and 1
chuck support, with integrated tool tray

Power Clamp Comfort NG with cooling,
rotary table, 1 chuck support, integrated tool
tray and craning boxes

Power Clamp Profi Plus NG
High powered shrink fit machine
– Heating power 20 kW
– For shrinking of tools from Ø 1/8"–2"
(3–50 mm)
– For HSS- and solid carbide tools
– Big coil for Ø 1 1/2"–2" (40–50 mm)
optional
– Incl. rotary table and chuck support
– Incl. tool tray
– With craning boxes for accessories

Technical details

Basic unit Comfort	3x400–480 Volt, 16A, 13 kW
Maximum length of shrink fit chuck (longer chucks upon request)	510 mm
Dimensions WxDxH	840x600x970 mm
Weight	70 kg
Speed Cooler unit	230 Volt/50 Hz, 1 kW
Dimensions	565x450x420 mm
Weight	45 kg

HAIMER POWER CLAMP NEW GENERATION INDUCTIVE SHRINK FIT MACHINE

Intelligent patented coil technology:

The coil adjusts itself to the chuck in length and diameter. Therefore only the shrinking area of the chuck will be warmed – nothing else. Shrinking and cooling will be much faster.

Even more efficiency, more flexibility, easier handling.

- Coil adjusts itself to the chuck
- Perfect magnetic flow due to length adjustment of the coil
- Optimal heat distribution due to length adjustment of the coil
- Lower chuck warming
- Shorter shrinking time
- Shorter cooling time
- Simple operation
- No contact discs necessary any more
- Suitable for T-shaped groove milling cutters
- Suitable for ultra-short chucks
- Suitable for special shape

Small tool

Big tool

Safe, dry, fast cooling

- Efficient: Shrink one holder while cooling another
- Water-cooled cooling bodies
- Concentrated cooling efficiency due to contact cooling
- Even cooling: No material deformation

Single hand operation

- Positioning of coil and regulation of heating with one hand
- Highest efficiency
- Minimum heating of the chuck

The turning table

- Work fast and efficient
- Heating and cooling at the same time on 2 stations
- No idle periods

Chuck support for 3 chucks

- For all actual tapers
- Also different tapers combined possible

Cooling bodies for rapid cooling

- Chucks remain dry
- No rust
- Hot spots always covered, no danger of injury
- Hot parts need not to be taken into the hand

The display

- User-friendly operating panel
- Clear, compact and easy to handle

The tool tray

- For laying down cutting tools
- Integrated in base plate

The craning boxes

- For accessories
- Everything close at hand

The system cart

- For a clearly arranged and ergonomic work place

The drawer

- Optional profiled inserts for accessories
- Everything in its place

Picture shows Power Clamp Comfort NG with accessories and system cart

POWER CLAMP PROFI LINE: START-UP MODEL

POWER CLAMP ECONOMIC

High performance shrink fit machine for all tools.

- With standard coil
- Single chuck version
- Without cooling
- With 1 base holder
- With 1 chuck support

- Power: 13 kW
- Mains voltage: 3x400–480V, 16 A
- Tools: solid carbide and HSS from
Ø 1/8"–1¼" (3–32 mm)

POWER CLAMP ECONOMIC NG

High performance shrink fit machine for all tools.

- With intelligent NG coil
- Single chuck version
- Without cooling
- With 1 base holder
- With 1 chuck support

- Power: 13 kW
- Mains voltage: 3x400–480V, 16 A
- Tools: solid carbide and HSS from
Ø 1/8"–1¼" (3–32 mm)

Technical details		Order No.

POWER CLAMP PROFI LINE: UPGRADE 1

POWER CLAMP ECONOMIC PLUS

High performance shrink fit machine for all tools.

- With standard coil
- Single chuck version
- With integrated contact cooling and Cooling Manager
- With 1 base holder
- With 1 chuck support

- Power: 13 kW
- Mains voltage: 3x400–480V, 16A
- Tools: solid carbide and HSS from
Ø 1/8"–1 1/4" (3–32 mm)

POWER CLAMP ECONOMIC PLUS NG

High performance shrink fit machine for all tools.

Upgrade to HD coil possible, for shrinking of Heavy Duty Shrink Chucks up to Ø 50 mm (optional)

- With intelligent NG coil
- Single chuck version
- With integrated contact cooling and Cooling Manager

- With 1 base holder
- With 1 chuck support
- Power: 13 kW
- Mains voltage: 3x400–480V, 16A
- Tools: solid carbide and HSS from
Ø 1/8"–1 1/4" (3–32 mm)

POWER CLAMP PROFI LINE: HIGH END MODELS

POWER CLAMP COMFORT

High performance shrink fit machine for all tools.

- With standard coil
- Rotary table with 3 stations
- With integrated contact cooling and Cooling Manager
- With 1 chuck support for rotary table
- Craning boxes optional

- Power: 13 kW
- Mains voltage: 3x400–480V, 16A
- Tools: solid carbide and HSS from
Ø 1/8"–1¼" (3–32mm)

POWER CLAMP COMFORT NG

High performance shrink fit machine for all tools.

Upgrade to HD coil possible, for shrinking of Heavy Duty Shrink Chucks up to Ø 50 mm (optional)

- With intelligent NG coil
- Rotary table with 3 stations
- With integrated contact cooling and Cooling Manager
- With 1 chuck support for rotary table
- With craning boxes

POWER CLAMP PROFI LINE: HIGH END MODELS

POWER CLAMP PROFI PLUS NG

High performance shrink fit machine for all tools.

- With intelligent NG coil
- Rotary table with 3 stations
- With integrated contact cooling and Cooling Manager
- Second coil for Ø 40–50 mm included

- With 1 chuck support for rotary table
- Power: 20 kW
- Mains voltage: 3x400–480V, 32A
- Tools: solid carbide and HSS from Ø 1/8"–2" (3–50 mm)

POWER CLAMP PRESET NG

High performance shrink fit machine for all tools.

Upgrade to HD coil possible, for shrinking of Heavy Duty Shrink Chucks up to Ø 50 mm (optional)

- With vertical stop for length presetting
- With intelligent NG coil
- Single chuck version
- With integrated contact cooling and Cooling Manager
- With 2 precision base holders and 2 precision chuck supports

- Power: 13 kW
- Mains voltage: 3x400–480V, 16A

POWER CLAMP PREMIUM LINE: FOR HIGH PRODUCTION

POWER CLAMP PREMIUM

High-end shrink fit machine for perfect handling and simultaneous cool-down at max. five cooling stations.

- Power: 13 kW
- Mains voltage: 3x400–480V, 16 A
- Tools: solid carbide and HSS from Ø 1/8" – 1 1/4" (3–32 mm)
- With standard coil V2008, NG coil optional
- TME Intelligent Cooling System with temperature control
- Integrated contact cooling with five cooling bodies
- Linear guided cooling bodies
- No damage to the edge of the cutting tool
- Incl. Speed Cooler and Cooling Manager
- Incl. 2 precision base holders and 2 precision chuck supports
- Incl. length presetting device
- Integrated drawer

POWER CLAMP PREMIUM LINE: FOR HIGH PRODUCTION

POWER CLAMP PREMIUM PLUS

High-end shrink fit machine for absolute process reliability with two separate electronic units and two coils.

- Power: 33kW
- Mains voltage: 3x400V, 63A
- Tools: solid carbide and HSS from Ø 1/8" – 2" (3–50 mm)
- With intelligent coil VS32 m and 20kW coil
- TME Intelligent Cooling System with temperature control
- Cooling bodies lift automatically after the completion of the cooling process (temperature-time controlled)
- Integrated contact cooling with six cooling bodies
- Linear guided cooling bodies
- No damage to the edge of the cutting tool
- Incl. Cooling Manager
- Two length presetting units with height stop
- Incl. 2 precision base holders and 2 precision chuck supports
- 3 integrated drawers

CHUCK SUPPORT FOR ER SHRINK FIT COLLETS

Chuck support for ER shrink fit collets with integrated length presetting.

- Precise clamping of the collet
- Fast and repeatable length adjustment with stop pin
- Adjustment with set screw and counter nut
- Integrated in chuck support, thus very space-saving
- Easy handling by turning of set screw and counter nut
- Application suitable also at multi-spindle machines for repeatable length presetting of twin tools

Chuck support	Size	Order No.
Chuck support for ER11	ER11	80.135.11
Chuck support for ER16	ER16	80.135.16
Chuck support for ER20	ER20	80.135.20
Chuck support for ER25	ER25	80.135.25
Chuck support for ER32	ER32	80.135.32
Base holder for Power Clamp Mini/Basic/Economic/Economic Plus		80.155.01

EASY SET SIMPLE LENGTH PRESETTING

Simple presetting

- Quick and simple presetting of tool overhang
- Maximum overhang length: 150 mm
- Accuracy: ± 0.05 mm
- Suitable for all shrink fit chucks and machines (flame, hot air, contact, induction)
- Space saving
- Excellent relationship between price and efficiency
- Can be added at any time
- Included in delivery: 3 stop clips (Ø 3–12, Ø 12–20, Ø 16–25 mm)
- Optional Ø 25–32 mm

Stop clips

Easy Set		Order No.
Easy Set [mm]	100 mm protruding length	80.123.00

QUICK SET LENGTH PRESETTING

Picture shows: Quick Set with base holder
(Base holder not included in delivery)

Length adjustment for shrink fit chucks without back-up screw, e. g. Mini Shrink

- Fast, repeatable length adjustment of the total tool assembly with stop pin
- Adjustment with set screw and counter nut
- Integrated in chuck support, thus very space-saving
- Easy handling by turning of set screw and counter nut
- Application also suitable with multi-spindle machines for repeatable length presetting of twin tools

COOLING ADAPTER AND COOLING ADAPTER BLANKS

Cooling adapters fit and cool an expanded selection of shrink fit chucks and extensions. The adapter is inserted into the cooling body and locked. Then it can be placed onto the shrink fit chuck.

- Cooling bodies for Ø 14–16 mm and Ø 25–32 mm with side lock

Cooling Adapter Blanks

For individual customization to each shrink fit chuck by the user.

TME COOLING SYSTEM WITH TEMPERATURE CONTROL

Temperature control of the shrink fit chuck during the cooling process for a safe handling

- Sensor in aluminium body measures temperature.
- If the temperature is too high: red light
- If the temperature is at the right level: green light
- Minimizes danger of injury due to hot chucks
- Patented temperature control

SHRINK FIT BRUSH

In order to achieve the best possible shrink fit connection, a grease free socket and shank is necessary. The cleaning can be done by a cold solvent (e.g. brake cleaner). An appropriate cleaning brush is necessary to clean the socket of the Shrink Fit Chuck.

REDUCTION SLEEVES FOR SHRINK FIT CHUCKS

Use:

For clamping small shanks in chucks with 12 mm ID's.

Step 1: shrink the sleeve into the bore of the chuck.

Step 2: clamp the tool shank in the reduction sleeve.

– Shank tolerance h6

THE MORE HAIMER, THE BETTER.

Passion for precision

HAIMER is a German, medium-sized family business. We develop and produce innovative ultra-precision products, primarily in the field of tool clamping. As the market leader in Germany, the continuous technological innovations of our products is very important to us and for this reason we annually invest 8–10% in research and development. With this budget, we can afford our own product development team, which constantly works on practical innovations and continual product improvements. 13 sales and service subsidiaries guarantee the first class HAIMER service and specific customer orientated product consultation worldwide on the spot. However, all products are solely produced in Igenhausen, Germany.

In accordance with our corporate philosophy: **Quality Wins.**

Our new North American Headquarters

Located in the Chicago suburb of Villa Park, HAIMER's new 25,000 ft² headquarters is designed and built to help facilitate the company's growth in the North American marketplace. It features state-of-the-art training facilities able to accommodate up to sixty people. The expanded showroom includes a CNC machining center for demo cuts, shrink fit and balancing machines under power, and HAIMER's complete range of tool holding solutions on display. Both the training facilities and showroom are wired with HD cameras for live and web-based presentations.

From our new facility, HAIMER will also provide balance inspection, precision balancing and data chipping services for tool holders from HAIMER or any other manufacturer. Future service offerings will include end mill regrinding as well as Safe-Lock™ groove modifications.

HAIMER USA – Chicago, Illinois
